

PFAS Test Results Available from EPA Study of Drinking Water

The Tampa Water Department's top priority is providing high-quality, clean, safe drinking water to residents and businesses in our service area. The water we provide is safe and meets or is better than state and federal drinking water regulations.

We are participating in a study to help the U.S. Environmental Protection Agency (EPA) determine regulations for unregulated contaminants, including per- and polyfluoroalkyl-substances (PFAS). Testing of treated drinking water began earlier this year and the latest quarterly results are now available.
