PROJECT DESCRIPTION

This project includes design and construction of a new traffic signal to improve safety and enhance access for the community. The project includes new sidewalk, marked crosswalks, pedestrian signals, ADA-compliant ramps, and detectable warning mats.

BENEFITS TO THE COMMUNITY

- Enhances safety to all modes of transportation at the intersection.
- Reduces the probability of right-angled crashes through the implementation of traffic signals and other improvements.
- Improves mobility and accessibility infrastructure for pedestrians and individuals with disabilities.
- Improves traffic flow at the intersection.
