RFQ - 19-D-00003; Howard F. Curren Advanced Wastewater Treatment Plant (HFC AWTP) Standby Power System Improvements Design - The City of Tampa Wastewater Department desires to obtain Professional Engineering services for the design work necessary to provide and install an additional stationary engine-generator standby power system at Howard F. Curren Advanced Wastewater Treatment Plant located at 2700 Maritime Blvd.

The selected firm, among other work, will be expected to design and develop the contract documents for the installation of: an additional 2 MW stationary standby power generator to expand the standby power capacity of the treatment plant to ensure an N+1 reliability, the installation of a 50,000 gallon fuel storage tank to increase the available fuel storage to provide 5-days of fuel consumption, electrical connections, controls, protective enclosures, and all other equipment necessary to complete the installation and integrate the new equipment into the existing standby power facility. Services will also include, but not limited to, engineering investigations, site planning, cost estimating, related permits, engineering services during construction, and all related work required for a complete project.

Background: The HFC AWTP is permitted to treat 96-MGD. Currently annual average daily flows are 60 MGD and peak flows of 200 MGD. The HFC AWTP existing Standby Power Facility at the HFC AWTP was constructed in 1995. The existing facility is comprised of four (4) Model 3615, 2,000 kW, 2,500 kVA Caterpillar diesel generators. The generators are housed in an enclosed building for a total of 8MW of connected standby power. The standby power electrical system was designed to supply power to the plant under peak flow conditions to meet Class 1 reliability. The existing generators are currently supplied by two (2) 12,000-gallon diesel underground storage tanks located near the standby power generation facility. These tanks are connected to a day tank pumping system that draws from the underground bulk storage tanks. This serves as a fuel reservoir for the standby power generators.

Estimated fee is \$400,000.

A pre-submittal conference will be held at 3 P.M. Monday, October 8, 2018, in the HFC AWTP Maintenance Building Training Room, 2700 Maritime Blvd, Tampa, Florida 33605.
