The City of Tampa Transportation and Stormwater Services Department desires to obtain Professional Architectural and Engineering services to provide final construction plans for the Streetcar Extension and Modernization Project. The services will include preliminary engineering for the preferred alternative with an option for final design, post-design and owner's representative services.

The project will require coordination with CSX Corp. for modifications to existing railroad tracks and addition of cantilever gates, signals and communications for the proposed railroad grade crossings, and coordination with FDOT for modifications to the BUS-41 (Tampa Street and Florida Avenue) corridors.

The City may elect to pursue an alternative contracting method for delivery of this project (GC/CM or Design Build (DB)).
