Task #2 – Acquire Background Data and Critical and Regionally Significant Asset Inventory

Description: The Firm will research and compile the data needed to perform the Vulnerability Assessment (VA), based on the requirements as defined in Section 380.093, Florida Statute (F.S.). Three main categories of data are required to perform a VA: 1) critical and regionally significant asset inventory, 2) topographic data, and 3) flood scenario-related data.

The Firm will identify assets meeting the definitions in s. 380.093, F.S., including those that are critical and regionally significant. GIS metadata should incorporate a layer for each of the four

asset types as defined in paragraphs 380.093(2) 1-4, F.S. GIS files and associated metadata must adhere to the Resilient Florida Program's GIS Data Standards (Exhibit I), and raw data sources shall be defined within the associated metadata.

Sea level rise projection data shall be associated with an appropriate tide gauge and will include the National Oceanic and Atmospheric Administration (NOAA) most recent intermediate-high and intermediate-low projections for 2040 and 2070, at a minimum.

Storm surge data used must be equal to or exceed the 100-year return period (1% annual chance) flood event.

In the process of researching background data, the Firm shall identify data gaps, where missing data or low-quality information may limit the VA's extent or reduce the accuracy of the results. The Firm shall rectify any gaps of necessary data.

Deliverables: The Firm will provide the following: 1) a technical report to outline the data compiled, including a list or spreadsheet of critical and regionally significant assets (including all types required by Exhibit 1, prioritized by most vulnerable to sea level rise, and findings of the gap analysis; 2) a summary report to include recommendations to address the identified data gaps and actions taken to rectify them; and 3) GIS files with appropriate metadata of the data compiled.

Task #3 – Exposure Analysis

Description: The Firm will perform an exposure analysis to identify the depth of water caused by each sea level rise, storm surge, and/or flood scenario. The water surface depths (i.e. flood scenarios) used to evaluate assets shall include the following data: current and future tidal flooding, current and future storm surge flooding, rainfall-induced flooding, and compound flooding. The scenarios and standards used for the exposure analysis shall be pursuant to s. 380.093, F.S. GIS files and associated metadata must adhere to the Resilient Florida Program's GIS Data Standards (Exhibit I), and raw data sources shall be defined within the associated metadata.

Deliverables: The Firm will provide the following: 1) a draft Vulnerability Assessment report that provides details on the modeling process, type of models utilized, resulting tables illustrating flood depths for each flood scenario, and maps of select scenarios to help visualize flooding impacts; and 2) GIS files with results of the exposure analysis for each flood scenario as well as the appropriate metadata that identifies the methods used to create the flood layers.

Task #4 – Sensitivity Analysis

Description: The Firm will perform the sensitivity analysis to measure the impact of flooding on assets and to apply the data from the exposure analysis to the inventory of critical assets created in the Exposure Analysis Task. The sensitivity analysis should include an evaluation of the impact of flood severity on each asset type and at each flood scenario and assign a risk level based on percentages of land area inundated and number of critical assets affected.

Deliverables: The Firm will provide the following: 1) a draft Vulnerability Assessment report that provides details on the findings of the sensitivity analysis, and includes visual presentation of the data via maps and tables, based on the statutory-required scenarios and standards; and 2) an initial list of critical and regionally significant assets that are impacted by flooding. The list of critical and regionally significant assets must be prioritized by area or immediate need and must identify which flood scenario(s) impacts each asset.

Task #5 – Identify Focus Areas

Description: The Firm will identify focus areas based on the results of the draft Vulnerability Assessment report and input from City Staff, following the guidelines in Chapter 2 of the Florida Adaptation Planning Guidebook. Based on the exposure and sensitivity analyses, the Firm will assign focus areas to locations or assets that are particularly vulnerable and require the development of adaptation strategies. GIS files and associated metadata must adhere to the Resilient Florida Program’s GIS Data Standards, and raw data sources shall be defined within the associated metadata.

Deliverables: The Firm will provide the following: 1) a report summarizing the areas identified as focus areas, with justification for choosing each area; 2) tables listing each focus area with any critical assets that are contained inside the focus area; 3) maps illustrating the location of each focus area compared to the location of all critical assets within the geographic extent of the study; and 4) GIS files and associated metadata illustrating geographic boundaries of the identified focus areas.

Task #6 – Critical Asset Focus Study

Description: The Firm will collect in-depth data from files and filed surveys on two critical assets determined by the vulnerability analysis and stakeholder engagement and approved by the City. The Firm will develop recommendations and work plans for adapting the critical assets to improve resilience. The Firm will conduct field surveys and coordinate with the City to gather any needed data or documents (including GIS files, planning documents, City priorities, etc.) needed to facilitate the Critical Asset Focus Study.

Deliverables: The Firm will submit a Critical Asset Focus Study Report containing recommendations and work plans to adapt two critical assets to make them more resilient: 1) all of the information and/or data described in this task description, provided in electronic format; 2) a summary report of the process and methodology of the data collection and study development, as well as an overview of any data gaps.

Task #7 – Local Mitigation Strategy

Description: The results of the VA can be used to inform a Local Mitigation Strategy (LMS) as required by the Florida Division of Emergency Management (FDEM). The LMS is usually developed at the county level and serves to reduce the risks associated with natural and man-made disasters, including sea level rise. The Firm will work with the City of Tampa and Local Mitigation Strategy Working Group (LMSWG) to ensure the VA Report and Critical Asset Focus Study is in

alignment with the existing county LMS Plan and will be utilized during the planning process of future county LMS Plan updates.

Deliverables: The Firm will attend meetings; participate in the planning process of the next major LMS plan update; and assist the City with submitting projects to the LMSWG to be included on LMS Prioritized Project List.

Task #8 – Final Vulnerability Assessment Report, Maps, and Tables

Description: The Firm will finalize the Vulnerability Assessment (VA) report pursuant to the requirements in s. 380.093, F.S. The final VA must include all results from the exposure and sensitivity analyses, as well as a summary of identified risks and assigned focus areas. It should contain a list of critical and regionally significant assets that are impacted by flooding and sea level rise, specifying for each asset the flood scenario(s) impacting the asset. GIS files and associated metadata must adhere to the Resilient Florida Program’s GIS Data Standards (Exhibit I), and raw data sources shall be defined within the associated metadata.

Deliverables: The Firm will provide the following: 1) Final Vulnerability Assessment Report that provides details on the results and conclusions, including illustrations via maps and tables, based on the statutory-required scenarios and standards in s. 380.093, F.S.; 2) a final list of critical and regionally significant assets that are impacted by flooding. The list of critical and regionally significant assets must be prioritized by area or immediate need and must identify which flood scenario(s) impacts each asset.; 3) all electronic mapping data used to illustrate flooding and sea level rise impacts identified in the VA, to include the geospatial data in an electronic file format and GIS metadata; and 4) a signed Vulnerability Assessment Compliance Checklist Certification.

Firm's maintenance of insurance coverage as required herein is a material element of the Agreement and the failure to maintain or renew coverage or provide evidence of same (defined to include without limitation Firm's affirmative duty to provide from time to time upon City's request certificates of insurance, complete and certified copies of Firm's insurance policies, forms, and endorsements, information on the amount of claims payments or reserves chargeable to the aggregate amount of coverage(s) whether during the term of the Agreement or after as may be requested by the City in response to an issue or potential claim arising out of or related to the Agreement to which Firm's insurance obligations hereunder may apply or possibly help mitigate) may be treated as a material breach of the Agreement. Should at any time Firm not maintain the insurance coverages required, City at its sole option (but without any obligation or waiver of its rights) may (i) terminate the Agreement or (ii) purchase such coverages as City deems necessary to protect the itself (charging Firm for same) and at City's option suspending Firm's performance until such coverage is in place. If Firm does not reimburse City for such costs within 10 days after demand, in addition to any other rights, City shall also have the right to offset such costs from amounts due Firm under any agreement with the City. All provisions intended to survive or to be performed subsequent to the expiration or termination of the Agreement shall survive, including without limitation Firm's obligation to maintain or renew coverage, provide evidence of coverage and certified copies of policies, etc. upon City's request and/or in response to a potential claim, litigation, etc.

The City reserves the right from time to time to modify or waive any or all of these insurance requirements (or to reject policies) based on the specific nature of goods/services to be provided, nature of the risk, prior experience, insurer, coverage, financial condition, failure to operate legally, or other special circumstances. If Firm maintains broader coverage and/or higher limits than the minimums shown herein, the City requires and shall be entitled to such broader coverage and/or higher limits maintained by Firm. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City. No representation is made that the minimum insurance requirements are sufficient to cover Firm's interests, liabilities, or obligations. Required insurance shall not limit Firm's liability.

Firm acknowledges and agrees Firm and not the City is the party in the best position to determine applicability (e.g. "IF APPLICABLE"), confirm, and/or verify its insurance coverage. Acceptance by the City, or by any of its employees, representatives, agents, etc. of certificates or other documentation of insurance or policies pursuant to the terms of this document and the Agreement evidencing insurance coverages and limits does not constitute approval or agreement that the insurance requirements have been met or that coverages or policies are in compliance. Furthermore, receipt, acceptance, and/or approval of certificates or other documentation of insurance or policies or copies of policies by the City, or by any of its employees, representatives, agents, etc., which indicate less coverage than required does not constitute a waiver of Firm's obligation to fulfill these insurance requirements.
